

Get started with Copilot

Microsoft Copilot Services SoftwareOne

Organizations process enormous amounts of data every day. Microsoft Copilot helps employees analyze information faster, create documents more efficiently, and make better use of knowledge within the organization. This frees up time for the tasks that truly matter, enabling teams to work more effectively and productively.

- AI has become indispensable and is here to stay
- Increasing AI literacy is a legal requirement
- Employees are using their own AI tools in the workplace
- Using AI leads to significant improvements in efficiency and quality

That's why it's essential to focus on the adoption of the AI tools you already have (Copilot Chat) or are planning to invest in within the Microsoft ecosystem (Copilot for Microsoft 365 and Copilot Studio).

Wherever you are on the journey of exploring, integrating, or automating, SoftwareOne offers standard and tailored programs to deliver real results together.

Explore with Copilot Chat

Make use of what is already available at no extra cost. Through short, open-access webinars, employees learn how to use Copilot Chat safely and effectively in their daily work. Sessions can be recorded, and impact can be measured with dashboards and surveys. Prevent Shadow AI and increase AI literacy.

Integrate with Copilot for M365

SoftwareOne helps embed Copilot into daily workflows through pilot groups, use-case workshops that break down everyday tasks into practical examples, campaigns, targeted training, and the creation of an internal Copilot community. Discover the real value and apply it.

Automate with Copilot Agents & Studio

With Copilot Agents and Copilot Studio, organizations can automate processes and develop custom AI solutions. SoftwareOne shares expertise and co-builds agents, including support for governance, Center of Excellence structures, Admin-in-a-Day sessions, and security baselines. Build your own digital expert within safe and compliant boundaries.

Did you know that...

SoftwareOne can leverage Microsoft Copilot funding programs to partially or fully finance initiatives?
